

THE EMPRESS EXPRESS

VOLUME XX, No. 22

EMPRESS, ALTA. THURSDAY, Oct. 27th, 1932

Price: \$2.00 Per Year.

United Church

Empress:
Church School, 2:00 p.m.
Public Worship, 7:30 p.m.
Social Plains, 2 p.m.
Leland, 3:30 p.m.
We invite you to worship with us.
Rev. Geo. A. Shields,
Minister.

Plants Show Renewed Life

Tom Rowles, sr., brought in a crop on Wednesday, which he had plucked from the prairie on Tuesday in full bloom. He also said that Caragana and Lilac bushes on his brother, William's farm, since the frost, were showing budding leaves.

In the inner pages of this issue will be found a full page advt. of the Sale of Men's Furnishings at F. G. Sandercock's store. This is your opportunity to secure some real buys in Men's goods.

IN MEMORIAM

HURLEBURT—In loving memory of a dear wife and mother, Mrs. Geo. Hurlebert, who departed this life at Empress, on October 25th, 1932.
Those who have a Mother, Cherish her with care,
For you never know the value
"Till you see the vacant chair."
Death very often comes to let us know,
We love more dearly than we show;
For love in death shall let us see
What love in life shall always be.
—Sadly missed by Husband and Family.
A loving grandma, true and kind,
No friend on earth like her we find.
For all of us she did her best,
And God gave her eternal rest.
—Grandchildren.

For Sale

Milk Cow, 4 years old, T.B. tested on October 15th, under Federal Government accredited herd plan, also met London—Milton Leach.

COME TO THE

United Church Banquet

and Concert, on Monday, Nov. 7th

TEA AND COFFEE

We invite You All Adults, 50c; Children, 25c.

CONSTRUCTIVE

Alberta Pool and Alberta Pool Elevators are constructive forces in Alberta agriculture.

The perpetuation and further development of these organizations should be the concern of all Alberta grain growers.

DELIVER YOUR GRAIN TO

ALBERTA POOL ELEVATORS

Neilson's Fresh Bulk Chocolates, now,
50c. a lb.

NEILSON'S ROSE BUDS—1 lb., 40c; 4 lb., 25c.
SULPHUR, 3 lbs., 25c.

DOLL CONTENT to start November 1st

WE EXPECT OUR CHRISTMAS CARDS This Week

EMPRESS DRUG CO., Ltd.

We are agents for leading nurseries. Cut Flowers ordered on shortest possible notice.

No Wheat Bonus

Ottawa, Oct. 25.—The Dominion is out in a position to pay a wheat bonus this year. Premier R. B. Bennett told the house of Commons today.

"The government is not in a financial position to pay the bonus on wheat in 1933," said the premier.

His statement was in reply to a question put by Arthur L. Beauchamp (Lib., Provencher).

Hospital Notes

Miss Mary Gillies, who has been on the sick list the past two weeks, is up and around and is recuperating at the home of Mr. and Mrs. Acton.

Burn—To Mr. and Mrs. E. Yest, of Estuary, Oct. 17 a son, Mrs. McFadyen of La Porte, was admitted to the hospital.

Miss Mona Hodgson, is a patient in the hospital.

Master Leland Scott underwent an operation on Wednesday.

Skating Rink Dance, Friday

A dance in aid of Skating Rink funds, is to be held in the Empress Theatre, on Friday evening, October 28. Admission will be 75c, a couple or 50c, a person. The rink has been considerably enlarged, ground levelled out and the enclosure erected out of old bridge plank. A good skating and hook by season is anticipated.

Chicago Live Stock Show

Chicago. — Dramatizing in spectacle the way the year's progress in American agriculture, the far famed International Live Stock Exposition will open its doors for its 23rd anniversary celebration at the University Chicago Yards, November 25 to December 1.

stockings from Great Britain have a tariff of 30¢ p.c., while the dress gloves of kid, elbow length, that ladies wear, are allowed in free.

An automobile or a motor cycle comes to free if any ever imported, while the humble bicycle pays a duty of 20 p.c.

Again, cotton sheets are taxed to the extent of 15 p.c., while linen sheets come in free.

Turning to the other side of the agreement, goods from Canada, e.g., Wheat, Cotton, Zinc and Lead, get a certain preference on the British market, provided they are sold there at not more than the World Price at the time. There may be later advantages for our Hams and Bacon, but this depends on the report of a Pig Committee now sitting.

The Cattle Embargo is now removed but, while the exchange rates remain as they are, our sales of any commodity is difficult, because when we bring a British pound back to Canada it is worth only about 65.00 instead of 4.00, last time.

The apple growers of Nova Scotia will get the most in the advantage as they get a definite preference of 4.64, per cent.

The disadvantages evident to all will be the increase of prices due to the increased tariff on 188 items.

It is predicted on all sides that the terms of this agreement will be the chief topic of discussion at the next General Election, which will likely be held in 1935.

Sincerely, F. W. Gershaw.

Alberta Preparing For 1933 Show

"Over a considerable part of Alberta the quality of grain being out is very good and Alberta growers should be able to exhibit at the World's Grain Show to advantage because of this high quality. It will be that farmers of this province remember that the Show will be held at Regina next year and take steps now to care properly for exhibition."—H. A. Craig, deputy minister of agriculture.

Too Much

"Who are those fellows Mike?"
"They're Shrimers."
"And what are Shrimers?"
"They're Masons."
"Sure and what the devil do they want now? They're getting big wages now."

The captain had been lecturing his men on their duties as soldiers, and to see how far they had appreciated his remarks, he said to one of them:

"Now then, Mike Flammigan, why should a soldier be ready to die for his country?"

"Mike thought for a while, and then said: 'Sure, Captain, you're quite right—why should he?'"

Bill says: "This soft job has many cravers."

"I am not running away from the election. I am out of politics. I am out of the district of Columbia," said Mrs. Woodrow Wilson, widow of the former United States war-time President, interviewed at the hotel Spitzer Hotel recently, where she stopped en route to Tulsa where she is attending the marriage of a family connection. Mrs. Wilson motored on to Chateau Lake Louise as part of her tour of the Canadian Rockies.

"I have never seen a more beautiful country or enjoyed a visit more," said Sir Philip Cliffride, latter, British Secretary of State for the Colonies, as he said farewell to his wife, Lady Cliffride, on his way to Calgary. He enjoyed his four-day sport fishing in that province, where he and his party took five fine fish, including a 12-pound salmon.

St. Mary the Virgin (Anglican Church)

October 30.—23rd Sunday after Trinity.
10 a.m., Sunday School
11 a.m., Matins and sermon.
3 p.m., afternoon service, Ainsley School House.
7:30 p.m., Lovrens, Evensong and sermon.
Rev. J. P. Horne.

Here and There

Honey produced in Canada in 1931, valued 27,427,397 pounds valued at \$2,034,004. Honey is produced commercially in all the provinces of Canada.

Registering an impressive advance in prices over recent years the best batch of Nova Scotia apples in the Liverpool market brought 25s to 25s per barrel as compared with 9s to 10s in 1931.

Great improvement and development over a period of 20 years has been noted in the Canadian seed industry. Last year 3710 seed farms with 12,000 persons occupied in the production and marketing of improved seed were estimated engaged in the industry.

Preliminary returns of maple sugar production in Canada just completed for 1932 show a total yield of 1,744,479 gallons of maple syrup valued at \$2,064,277 and 7,212,200 pounds of sugar valued at \$622,465. This production compares favorably with that of former years.

Cutting of wheat is nearing completion and threshing is well advanced in all the Prairie Provinces, with Manitoba leading, according to a report from the agricultural department of the Canadian Pacific Railway, western lines, dated September 25. Oats and barley at that date were 75 per cent cut.

Lisa, Cornelia, Chippewa Indian girl, who came to the Canadian Pacific French River Junction, recently, has been presented with a purse of \$150. J. G. Strathmore, manager of the company, stated that she would be thoroughly trained and would enter the contest annually until she won.

Wheeling airplanes added a routine to the show, the chasers with which passengers and well-known Pacific French River Junction, who came to the Empress of Britain on his return to England aboard the Empress of Britain, as she sailed on her seventh departure of the 1932 season from Wolfe's Cove, Quebec. The intrepid solo trans-Atlantic flyer promised a quiet time on his trip by Captain Latta, commander of the Empress.

For All Who Prefer Quality

"Fresh from the Gardens"

The Sun Is Shining.

As the writer sits down before his typewriter to type out this article, bright sunshine, typical of these beautiful Indian summer days on the prairies, is streaming through the window, while there is that invigorating tang in the air which leads one to throw back their head and draw in a lungful. The sun is shining, and in these days when we are all too prone to dwell on the dark side of things, it is well to remember that the sun is still there, shining away as strong as ever, the only difficulty being the clouds that intervene to obscure our vision.

The sun still shines, not only in the actual meaning of the words in the physical world, but in the sense that there is much of brightness and warmth in life itself. Admittedly there are still difficulties ahead for many people, there are very acute problems to be solved, not only by individuals, but by communities and governments. These difficulties must be overcome, and solutions for these problems found, but there is not a very large ray of sunshine indeed in the knowledge that never before in the history of mankind were so many people, including the keenest brains in all countries, devoting their time, their intellects, their energies, to searching out and testing the efficiency of the remedies to be applied. The world knows there is something out of joint somewhere there is surely comfort and satisfaction in the knowledge that people are not just letting things drift in the hope that something will turn up to bring about a betterment, but, on the contrary, are tackling the problem from all angles with a view to effecting that betterment and to preventing a recurrence of present difficulties.

Some people, who take as if they believed the sun had been finally and forever blotted out, can see in circulating pessimistic views to the effect that the moral character of people is breaking down, that they are losing their initiative, that, instead of retaining confidence in themselves and a pride in their own achievements, they are willing to become the mere hirelings of the state. In the prevailing atmosphere of gloom in which such people surround themselves, they are growing up a generation of leaders and criminals. Is this a true picture? If it is, how can one account for such a highly disheartened state of things, as reported in the Toronto Globe, that during the recent Canadian National Exhibition at Toronto, nearly a million and a half people passed through its gates, and in all that time no arrest on a major charge was made. As the Globe says this is a remarkable record.

The Globe says further that there were but two fires, and these of no great consequence, further evidence of a community conscience exercised by dwellers in what for the time-being was a great city exposed to the dangers besetting all densely populated urban areas. There is no evidence in those reports that Canadian people are losing their normal grip, inclined to disregard the law and to engage in reckless, irresponsible acts.

The sun is shining. The spirit of helpfulness which rose to great heights during the tragic years of the war still lives in the hearts and minds of our people. It was displayed last year when people in the older sections of Canada shipped trainloads of supplies to assist and comfort their fellow-citizens in the drought-stricken areas of Saskatchewan. It is being displayed this year within the confines of that Province by a great rallying together of people who "have" in order that they may be able to help, again this year unfortunately, "have not." It reminds one of the war days when Red Cross branches, Patriotic Fund committees, and other organizations with like objects were organized and active in even the smallest hamlet and rural district to road end of the organization of voluntary relief committees in areas where there are crops, albeit not very profitable, to assist the people in the smaller areas where, again this year, there have been no crops.

The sun is shining in the hearts of those who are building up and supporting these voluntary relief committees, and the sun will be shining in the homes to which such aid is extended.

And the clouds are growing thinner and lifting. Every now and then a ray of sun breaks through because it has been a cloudy day. The clouds will finally break and disappear, and the sun burst forth in all its splendor and life-giving warmth. Despite all our discouragements, let us keep our courage, just as we are, as a people, clinging steadfastly to our old-time concepts of honesty, morality, industry and respect for the laws and institutions of our country.

French Taking To Tea

Dickens' Books Popular

Customs Reports Show Imports Doubled In Two Years

People of France, long noted for their wines, are taking to tea. The latest returns show that in the last two years imports of tea have doubled. Moreover, the leaves for the beverage, which are formerly come through England, now are shipped direct from India and Ceylon to Marseilles, Havre and Bordeaux. Experts say the change is the result of the importing of better tea, and the teaching of how to get best results in using the hard Paris water in tea making.

Always At Work

"We do not get rid of accidents by protesting; they ought not to happen. Let us remember that those laws of Nature which we sometimes suffer, are always at work, and it is our duty to obey. The ocean waves carry a thousand ships at the very time they engulf one."

Demand For Works Exceeds Supply Says London Librarian

The man who made Christmas—Charles Dickens—is as popular as ever among book-lovers. A London librarian, discussing what the public read, has revealed that Dickens' works are demanded more frequently than they can be supplied. Scott, however, seems to be out of favor. Dickens also figures in a list of the thirteen books most widely read by girls over twelve in another big public library. It includes "David Copperfield" and "The Old Currier's Shop." Boys also stick to the old favorites, but they actually prefer books in which the flavor of adventure is stronger. "Robinson Crusoe," "King Solomon's Mines," "The Swiss Family Robinson," and "Treasure Island" are the best-selling books of the latter category. But, of course, a certain of the classics are prescribed by teachers for home reading, and that may boost up the demand for them.

Club Reporter—"I'd like some advice sir, on how to run a newspaper." Editor—"You've come to me for the wrong person. Ask one of my subscribers."

All Her Children Were Troubled With Diarrhoea

Mrs. J. B. Dickert, R.R. 1, Embury, D.C., writes:— "Last Summer all my children were troubled with diarrhoea. I was so bad I did not know what to do. A friend told me to give them Dr. Fowler's Extract of Wild Strawberry, so I got a bottle, and after a couple of doses you should have seen the change. The children were well again, and I am very thankful to your wonderful remedy. I find it the only one that relieves so easily and quickly."

Australian Pleased With Radio System

It Is Nationally Owned and Working Well Says Bruce

Australia's nationally-owned radio system, now controlled by a committee of five, is working well, says Stanley M. Bruce stated at Ottawa after the Imperial Conference. The leader of the Australian delegation expressed interest in the national broadcasting commission to be appointed to supervise Canadian radio.

Mr. Bruce stressed importance of selecting qualified commissioners and said the entire Australian supervisory body had been chosen because of cultural background, business efficiency and general sympathy with important public movements. "Be sure you do not let politics play a part in the selection," he advised.

"I do not think any of the Australian commission members were ever mixed up in politics," Mr. Bruce said. Great interest and considerable satisfaction had been expressed with regard to the Australian commission, which acts in an advisory capacity and as a court of final appeal, but does not do the executive work. The commissioners are part-time workers in the country, remuneration of \$400 annually, with \$500 for each chairman.

Law Bans Shooting Ducks At Churchill

Port Still Under Construction and No Firearms Allowed

While sportsmen in northern Manitoba, banded away in the mallards and teal as they flew south, the hunters of Churchill had to sit idly by and watch the birds enjoy the peace and solitude of the lake. Churchill is still "under construction" and the law says that no firearms are allowed in the camp.

The ducks in this district are duck right in camp. They fed on the grain that scatters from box cars and found the choice morsels of vegetation in the bushes around the camp. They were quite tame, having been fed for weeks by the workmen.

Fraggers who arrived from along the west coast said that ducks and geese flew from the sloughs in thousands a few miles east.

The ducks in this district are chiefly pintails and mallards, with a few teal. To the north and east and west there are large numbers of Pintails. They are protected there by the Eskimos who will not run short of food.

Prefers North Country

Woman Very Eager To Get Back To Alaska

It's nothing to drive forty miles to a dance in the north country, according to Mrs. Elizabeth Marsh of Iktalik, Alaska, who has been visiting her relatives in Vancouver. "The dances are the big social event up north," said Mrs. Marsh. "I've never missed one of them since going up there twenty years ago."

Mrs. Marsh says she never thinks of the cold in the Arctic country. Winter is coming on now, but she is eager to be back in the land where the ground is covered with ice and snow most of the year.

After several years at Wrangell, Mrs. Marsh went to Fairbanks by train and then 500 miles by dog sled and afoot over the lofty Khatay River to McGrath at the head of navigation on the mighty Kuskokwim River. For thirteen years she has been living at near McGrath. She looks after the men's laundry and keeps the house.

New Help For The Blind

An ingenious apparatus recently perfected enables a blind person to read the ordinary type in magazines and newspapers. It raises each letter on a "touch panel" by the use of a light, iron, photo-electric cell, electromagnet and touch points.

An efficacious household remedy—Douglas' Egyptian Liniment—Brings immediate relief to lame back and muscular rheumatism. Also relieves indigestion, burns, sores, cuts and warts.

An American hunter is to swim in shark-infested waters "to discover why sharks attack human beings." How will he let his pet shark know what he discovered?

Keep strong the Winter through

SCOTT'S EMULSION of Norwegian Cod Liver Oil

Builds Resistance Easy to Take

Had Dual Personality

Amazing Story About British Officer Has Been Revealed

As an officer in the British army during the world war, he was stripped of his rank, degraded before the men he had commanded and sentenced by court-martial to be shot for cowardice.

As a private in the French army, going through the worst fighting around Verdun, he was promoted on the field for courage and decorated afterwards by Marshal Foch, who described him as "the bravest man I have ever known."

This is the amazing story of a dual personality which has been revealed for the first time by French government documents.

This cowardly Englishman, by birth, was 19 when the war broke out. He was working in France, and hurried home to join an English regiment.

Shortly after his arrival on the French front he was involved in an affair resulting in his being charged and convicted of cowardice. On the night faced for the execution the man who was known as Potter, managed to escape, and was sent for some weeks by a French woman.

The hue and cry for him eventually died down, but apparently driven by remorse, he joined the foreign legion, claiming to be an Alsatian. He gave his name as "Henry Mayer." Because he spoke perfect French he was able to get away from the legion.

"Mayer" won the rank of captain, was wounded seven times, and has been mentioned numerous times for conspicuous bravery. Recently his real identity was discovered by the French police, but it appeared that he will be shown mercy by his own government in view of the extraordinary circumstances.

No Clerks Needed

Stores without stockkeepers are to be opened in London. Every sale will be automatic. Customers will simply walk up to the store window, select what offerings they desire, put their money into a slot press a button and receive the purchase and change immediately. The stores will supply all kinds of proprietary articles, from a box of pills to a pound of tea.

Makes Use Of Steam

The discovery of a new process of extracting valuable minerals from worthless rock without the labor and expense of first pulverizing the entire ore, has been announced. The minerals are separated from the worthless rock by steam explosive shattering.

An Oil Without Alcohol—Some oils and many medicines have alcohol as a prominent ingredient. A judicious mingling of six essential oils compose Dr. Thomas' Electric Oil, and there is no alcohol in it, so that its effects are lasting.

Treaty Still Holds

In order to prevent the city of Syracuse from reverting to the Seneca Indians, the state of New York gives members of the tribe 10 pounds of salt every year to keep up terms of a treaty made in 1795.

John Hancock's signature on the Declaration of Independence was so large that his name has been known to many with signatures ever since.

We can understand why some people do not care for opera, but why do they get peevish because other people like it?

Do not waste your money on cheap imitations. Buy the genuine.

Wood Regains World's Speedboat Record

American Pilot Averaged over 124 Miles An Hour

Car Wood regained the world's speedboat record by sending his "Miss America, X" catapulting twelve over measured miles on the St. Clair River at Algoma, Mich., at an average speed of 124.91 statute miles an hour. The former record, 115.75 miles an hour, was made on Loch Lomond, Scotland, July 18 last, by Kaya Don, British speedboat pilot, who tried unsuccessfully to wrest the Harmsworth trophy from Wood.

Wood, after the record-breaking run, said "Miss America's" four 12-cylinder engines had not been wide open in the effort and he thought the big, mahogany-hulled thunderbolt could go faster. "How much faster, I can't say," he said. "The motors were making 2,500 revolutions per minute. Their limit, with safety, is 2,700 revolutions per minute."

Did Not Heed Warning

Eight Calgary Residents Partially Blinded In Recent Eclipse

Eight Calgary citizens have received medical attention for varying degrees of blindness as result of watching the eclipse of the sun by the moon August 21, without the aid of darkened glasses. It was shown in inquiries made by eye specialists.

One woman is almost totally blind in one eye while her other eye is unaffected. Others suffered less severe strain and were partially blind.

Whether the affected persons will completely recover will not be known until a statement is further advanced. The Practically all will be receiving attention for three or four months.

Found Their Own Market

Price Offered Did Not Suit Ontario Growers of Brittany

When growers of onions in the vicinity of Roscoe, Brittany, could not get the price desired for the yields of their small farms last season, they formed a syndicate, chartered a small sailing vessel, loaded on 10 tons of onions, and sailed for Scotland. Carrying long strings of the onions on poles, they went from door to door in Glasgow and other cities peddling their wares. When the cargo had been sold, the growers figured up and found that the net profit was much larger than had they sold the vegetables at home.

Exhausted From Asthma. Many who read these words know the terrible pain upon health and strength, which comes in the train of asthmatic trouble. Many do not realize, however, that there is one true remedy, which will usually stop this drain. Dr. J. C. Williams' Asthma Remedy is a wonderful cure to this everlasting ailment. It is the only record of relief to its credit. It is sold almost everywhere.

Leads In Highway Mileage

Saskatchewan Heads All Provinces With 155,609 Miles

Saskatchewan leads all the provinces of the Dominion in highway mileage, with 155,609 miles open for traffic. On December 31, 1931, according to a report issued by the Dominion Bureau of Statistics.

Alberta came next with 62,246 miles, and Ontario with 52,119 was in third position. Other provinces, with their mileages, were: Quebec, 35,763; British Columbia, 22,459; Nova Scotia, 14,719; New Brunswick, 11,829; Manitoba, 5,230; and Prince Edward Island, 3,600 miles. The total highway mileage in Canada is 378,094.

For years Mother Graves' Worm Exterminator has ranked as a reliable means of preparation and it always maintains its reputation.

Eskimos in Canada

Bureau of Statistics Reports Gives Number As 5,970

There are 5,970 Eskimos in Canada according to the census of 1931, and they are located as follows: Yukon, 53; Northwest Territories, 4,670; Quebec, 1,139; Manitoba, 62; Alberta, three. There are 3,116 males and 2,854 females, says a report of the Dominion Bureau of Statistics.

It is impossible to say definitely whether the Eskimos have increased or decreased during the past decade, but the impression is they are increasing.

"Deverlasting" oranges, when after ripening turn green again if not picked and next year ripen to a better quality have just been introduced from America into Spain.

Russians Cannot Send Food Through Moscow

Attempts To Relieve Famine Disallowed By Soviets

Hungerbrot bread, flour, cereals, meat oils and other foodstuffs are to be barred from the mails, the post-office announced.

It is hoped in this way to stop the voluntary and individual attempts to relieve famine which prevails in many provincial districts.

In the past half-year has become the shortage of food and more so serious throughout large areas of the Soviet Union that desperate methods of obtaining bread have been resorted to. Moscow and, to a lesser degree, other large cities have been jammed with peasants selling their last odds and ends of valuable for trade.

The stations swarm with peasants, each staggering under a heavy sack full of bread, back to the provinces and the farms.

Much food has also found its way through the mails. Friends and relatives in the capital have endeavored to relieve the suffering of their dear ones by occasional shipments of food. Food has not been plentiful in Moscow, but again doing so much and direct speculation has enabled many to accumulate a few leaves extra or a few pounds of meat of some sort.

This channel has been plugged. Peasants will henceforth either have to attempt to get aboard already hopelessly overcrowded trains for a personal visit to Moscow—or starve.

Sleep is the great nourisher of infants, and without peaceful sleep the child will not thrive. This cannot be gotten in the capital, be endeavored to relieve the suffering of their dear ones by occasional shipments of food. Food has not been plentiful in Moscow, but again doing so much and direct speculation has enabled many to accumulate a few leaves extra or a few pounds of meat of some sort.

This channel has been plugged. Peasants will henceforth either have to attempt to get aboard already hopelessly overcrowded trains for a personal visit to Moscow—or starve.

Achieved Her Ambition

Child Crippled With Infantile Paralysis Learned To Swim

An 11-year-old crippled girl recovered from infantile paralysis at a camp this summer happy, for she had achieved the ambition of her short lifetime.

Caroline Laurence, crippled with infantile paralysis since she was five, always had been afraid of the water. This year she learned to swim. She attended a camp near Burlington, Wisconsin, in the company of 200 other crippled children, all of Chicago.

A Remarkable Forest

Trees Four Feet In Diameter Are Only Feet High

What is believed to be the most remarkable forest in the world has been found on the west coast of Africa. Although the trunks of the trees are as much as four feet in diameter, they attain the height of only one foot. No tree bears more than two leaves, which attain a length of six feet and breadth of two feet. The forest covers a tableland six miles in width.

In earlier days of the world, there were dragon flies that had a wing spread of two feet.

Twelve hundred and fifty American tourists landed in England during a recent weekend.

DR. HAMILTON'S PILLS

HEADACHE INDIGESTION BILIOUSNESS CONSTIPATION

W. N. U. 1902

Dawning Of A New Era

Fifty Years Ago Edison Saw Possibilities Of Electricity

When the lights of fifty-nine customers were turned on exactly half a century ago in a square mile of downtown New York Edison declared that the occasion was a great transition from one epoch to another. At the time the observation was a tribute to the natural enthusiasm of an inventor in his thirty-fifth year, the sort of flourish that one expects at the completion of any public enterprise. But now that the fiftieth anniversary of his greatest achievement has been celebrated it is evident that he saw more clearly than any of his contemporaries how electricity would transform society. Trolley cars and subways instead of horses, Edison lamps in place of kerosene and gas, machines driving everything from sewing machines to battleships, energy on tap everywhere, like water—a new epoch had indeed dawned when the switch was thrown in Pearl Street on September 4, 1882.—New York Times.

Dogs Aid Smugglers

Show Extraordinary Cleverness In Evading Spanish Coastguards

Spanish coastguards have to face a new enemy in the form of cleverly-trained dogs used to smuggle contraband ashore from boats, according to General Soto Pacheco, of the Corps of Carabancheros. In a statement made to a Madrid newspaper. "The general says: 'It is extraordinary the way these dogs work. When they see a contraband ship change their direction, and avoid him without making a sound. On reaching the shore they do not make themselves as dogs usually do, but set off at full speed to their destination. Nevertheless many of them are shot down.'"

The dogs carry "a contraband in bundles wrapped in waterproof material and strapped to their backs."

Feature At Chicago Fair

Women's Importance Will Be Fully Recognized At Exposition

Contributions of women to the social and economic life of the world during the last 100 years will be fully represented at the 1933 Century of Progress Exposition.

There will be no special women's building, because "woman's position in the economic and social life of the world is too important to be isolated in a special building," officials in charge of arrangements declare.

Plans are also being pushed for the International Congress of Women that will be held in conjunction with the exposition.

Greek To Him

An oculist was examining the eyes of a patient and had requested him to read the top line of a test card, the letters of which ran H P T R V Z B F H K.

When some moments elapsed, the specialist said: "Do you mean to say you cannot read letters of that size?"

"Oh, I can see the letters all right," replied the patient. "But I can't recognize the blooming word."

An Envious Position

Red Deer, Alberta, after three years of depression, can show an enviable financial sheet. It has a balance in the bank of \$41,000 which is \$7,000 more than last year, and sufficient funds to meet an \$18,000 debt on October 1, with a nice nest egg for the future.

Completing Survey

A survey of the town of Churchill, Man., will be completed this autumn for the purpose of laying out the residential area of the townsite in preparation for settlement next year, according to Hon. J. E. McLeod, the Manitoba Minister of Natural Resources and Industry.

Two factories just started in Norway will produce pencils and lighting rods.

"Now we are engaged, I must confess that I have an uncle in prison." "That's all right. All my uncles ought to be in prison."—Vart Hjem, Stockholm.

W. N. U. 1932

A Musical Genius

One Orchestral Pianist Gives Remarkable Performance In London, England

A musical genius of only one arm achieved a great triumph at Queen's Hall, London, as a pianist. It was at a promenade concert and the artist was Paul Wittgenstein, who was an Austrian soldier in the great war, received a wound which necessitated the amputation of his right arm. It was the first performance in England of a novel work, namely a pianoforte concerto, the solo part having been written for this handicapped pianist.

A writer in the News-Chronicle says of the one-armed pianist:

"One scarcely knows whether to admire more the courage or the resource of this musician. Finding himself disabled by the loss of an arm, Wittgenstein's first step was to commission the leading German composer of the day, Richard Strauss, to write for his exclusive use a work for piano and orchestra with a solo part playable with one hand."

"This single work and the remarkable story associated with it took Paul Wittgenstein round the world and won him the reputation he has followed up that commission with others, and the concerto played in London, England, is the result of a similar deal with Ravel, the Basque composer."

Two Seamen Killed

On French Submarine

Thirty Also Injured In Explosion During Trial Run

An explosion aboard the new French submarine "Proteus," during a trial run off Cherbourg, killed two seamen and injured 30 others, the surprise of the fleet.

The vessel, which was seriously burned and 22 suffered minor injuries or burns, or both.

Most of the injured were from the submarine "Proteus," which sank off Cherbourg last July with a loss of more than 60 lives.

Height Of Tower Changes

Eiffel Structure Expands and Contracts According To Heat

The Eiffel tower, still slim and trim after 43 years of watching Paris grow larger and larger. Increased its height from 50 to 75 metres during the French day when the excessive heat caused the steel structure to expand. When cold winds blow the tower shrinks below its normal 300 metres, due to contraction. The headways from side to side as much as ten feet, but, like the Colosseum of Rome, it is not a danger. The head and is empty and who sways noticeably from side to side, the Eiffel tower is perfectly safe.

Figures Are Confirmed

Professor Piccard Reached Height Of 30,000 Feet

Dr. Auguste Piccard and Max Cosyns, both Belgians, reached a height of 16,201 metres (10 miles, 117 yards) in their world balloon ascension of last August 18, stated an official report by the Swiss Aero Club, received at Brussels, Belgium.

Though slightly below the height of 16,500 metres claimed by Professor Piccard, the official figures showed they ascended higher than any other human beings, and exceeded the record of slightly under 10 miles made last year by the professor.

True To Form

They were in the club and the conversation turned to Scotsmen.

"From my experience," said Brown, "I've found it best to take these stories about Scotsmen with a pinch of salt. For instance, I once knew an Aberdeen who found a 22-carat gold ring in the street. The old blighter at once put a big display advertisement in a local newspaper. He stated that the owner had to be paid to pay for the advertisement."

A Great Combination

Judge—"How fast were you going Sambo?"

Sambo—"Tolerable fast."

Judge—"Thirty miles an hour?"

Sambo—"Yessah, ah, yessah, I was goin' mosh dun 40 miles an hour, Ah vuz goin' 70 miles an hour. Oh, yassah, Ah vuz goin' 70 miles an hour, yassah, Judge."

Judge—"What kind of a car were you driving?"

Sambo—"A Ford, Model 'T'."

Judge—"Preposterous, you could not go 70 miles an hour in a Model T Ford. That's impossible!"

Sambo—"Oh, yassah, I tink impossible still. Ah always makes mah 70 miles an hour in dat car. Dis is a special kind of Ford, Judge. Dis chash has got a Ford body, a Packard chassis, an Pierce-Arrow engine."

Prizes Not Exempt

Even prices are not exempt from carefully watching "a lot of little judges" which others may pick up. The Duke of Gloucester lost his suitcase, pilfered from a car, temporarily "disappeared," being driven in the west end of London, England. It did not contain anything of very great value.

Italy has a back-to-the-farm trek.

CANADIAN AVIATOR TO FLY TO MOSCOW

Captain Errol Boyd, only Canadian to fly over the Atlantic Ocean in a non-stop flight, has announced his intention to take off from New York for Moscow as soon as the weather is right. By taking this line of flight Captain Boyd hopes to break the long distance non-stop record now held by John Russell Boardman and John Polando on their flight to Turkey. Above are pictures of Boyd and his plane.

Near-Gold Dinner Service

Will Be In Sheffield As Joke It Created Immediate Demand

Would you like a gold dinner service or, rather, one that looks like gold? If so it will not be long before you can buy it just as cheaply as the familiar nickel plate.

Curiously enough, the new "gold" is made in Sheffield, the city of steel. The first just-like-gold dinner service was made as the result of a joke. Messrs. W. Turner and Co., had been experimenting for some time with a new alloy of aluminium and bronze which has all the appearance of good red gold. "Why not make poor men feel like millionaires?" someone suggested, and for a jest the first near-gold dinner service was made. To the surprise of the firm it aroused an immediate demand. People liked the idea of eating off gold, and the new metal is easy to look after, since it is almost stainless.

The biggest demand, though, is likely to come from South America and other Latin countries, where there is a deep love of gold itself or of metal that looks like it.

Work Is Made Easy

Poultry Raisers Can Have Many Labor-Saving Devices

Labor-saving devices for poultry raisers are numerous. By pulling a rod all the windows on a thirty-foot section of a shed can be made to open or close at one time. Poultry food is not carried into the houses. It is brought alongside by motor-lorry, then a small door in the wall is opened, a hopper drawn out, and the food poured straight into it. It falls into a container inside the house. All the houses are supplied with fresh water, which is kept during the winter at a temperature of forty to fifty degrees Fahrenheit by electricity. From October to February, to increase egg production, the birds' feeding day is kept at fourteen hours. Electric light is switched on and off by time-clock morning and evening. The poultry food is mixed on the premises in a giant blender. It is given to the birds in the form of an all-weather ration, of which they consume nearly 200 tons a week.

Saving Wet Wheat

Grain Can Be Dried Without Damage To Quality

Artificial drying of wheat in Canada has now been practically perfected by the National Research Council's Associate Committee on Grain Research. Losses of crop ranging from 25 to 50 per cent, and cash deductions totaling millions of dollars were sustained by Canadian farmers in recent years through tough or damp grain. The latter may now be dried without damage to its milling and baking quality through the efficiency of commercial driers. Experimentation is being extended to include processes for the drying of barley and other coarse grains.—Department of Agriculture, Ottawa.

Condensed Milk Exports

Exports of Canadian condensed milk in July registered an increase of 33 per cent, over July, 1931, exports of evaporated milk were practically doubled and milk powder exports increased by 27 per cent.—Department of Agriculture.

Service In Yorkshire

Disturbed By 'Plane Machine Carried Camera Men Anxious To Get Pictures

The press photographer who takes his pictures from an aeroplane has got himself into bad odor in several parts of England. A special Sunday service was held in the ruins of Fountains Abbey, in Yorkshire, in commemoration of the 500th anniversary of the founding of the abbey. The service was attended by the Duke and Duchess of York. It was a perfect day for a celebration held in such wonderful surroundings. Yet the words of the Bishop of Ripon were almost drowned by the roaring of an aeroplane conveying press photographers, which persisted in swooping down over the ruins.

Something very similar happened during the pontifical high mass in Phoenix Park, Dublin, Ireland, at the Eucharistic Congress. An aeroplane intruded at the most solemn moment.

MotORIZED FARMS

Some Interesting Figures From Dominion Bureau Of Statistics

From the current issue of the "Economic Annals," official organ of the Dominion Agricultural Economics Branch, the following figures are taken:—From a recent report of the Dominion Bureau of Statistics we learn that there were 321,300 automobiles on the 728,653 farms in Canada; about eighteen thousand farms reported more than one car. There were 48,402 trucks, 100,000 tractors, 75,960 threshing machines and 8,920 combines. Electric motors numbering 18,626 were found on 14,638 farms."

Opinion Was Divided

"You say you are the sole support of your mother, your father having been killed recently in an explosion. How did the explosion happen?"

"Mother says it was too much yeast, but Uncle Jim thinks it was too little sugar."

Still Going Strong

Thousands of human generations all as sturdy as ours have been swallowed up of time, and there remains no wreck of them any more; and Arcturus and Orion and Sirius are still shining in the southern sky, and young, as when the shepherds first noted them.—Carlyle.

Friend-How Drowsy!

When an aeroplane, zooming low overhead, drew the attention with a truck speeding through Red Wing, Minnesota, with its cut-out open, no one paid any attention to the noise. Two minutes later a sheep, being carried on a second truck, began to bleat. Traffic was tied up and business was at a standstill as clerks and office workers ran to the street or leaned from windows to see the cause for the excitement.

First June Bride—Oh, a joint bank account must be nice.

Second June Bride—Yes, it's a lovely arrangement. My husband deposits the money and I draw it out.

Friend—How drowsy! The train in which you were travelling actually crashed into the waiting room!

Mrs. Newrich—Yes, and the third-class waiting room, of all places!

Passing Of "Old Bay Store"

Historic Building In Winnipeg Is Demolished By Wreckers

Steeped in an atmosphere of pioneer days, the "Old Bay Store," a direct line descendant of old Fort Garry, is disappearing. Yesterday the merry shouts of Hudson Bay fur traders echoed about its walls. Today it is demolished, in the interests of economy.

The old landmark was built in 1881 at the junction of the Red and Assiniboine Rivers, 143 years after Pierre Gaultier de Varennes, Sieur de la Verendrye had arrived at the site of the future city of Winnipeg. Its foundation was of stone taken from old Fort Garry and facing bricks used in its construction were imported from faraway St. Louis. They are said to have cost 75 cents each.

Removal of this historic building conjures up memories of the old Winnipeg forts—Rouge and Gibraltar, Douglas and Garry. Conflicts between the old northwestern company and "Bay" servants come to mind; ceding of government to the young confederation; the inauguration, led by the Metis, Louis Riel, and his colleagues with the arrival of Col. Wolseley's army.

Little now is left of the buildings around which the old Red River settlement was founded. Old Fort Garry, above the site of which workmen have been so busily engaged in the work of demolition, disappeared in 1882. Only the front gate, which was made of stone taken from the walls of this historic group of buildings.

Small Pests Cause Strike

Shellers In Covent Garden, London, Objected To Pay

Pest-shellers in Covent Garden, London, England, recently struck because the peas were too small. Nearly 70 women employed by William Bailey, whose family has supplied peas to restaurants for more than 100 years, declared that it took too many peas to fill a quart, and they were paid four cents a quart for shelling small peas as against five large. Bailey explained the economics of the pea industry, and after being out for a few days the strikers returned to work.

World's Slowest Train

Takes Week To Cover 1,831 Miles In Australia

Australia believes it has the slowest train in the world. It is the "tea and sugar" special, which carries stores from Port Augusta to settlers along the route to Kalgoorlie. The schedule calls for a week to travel the 1,831 miles and a week for the return trip. Practically the only passenger is William Cowan, the railway's unaccompanied missionary, whose "parish" covers the entire line. He carries hundreds of newspapers for distribution on each trip.

More Gold Salvaged

The Italian salvage ship "Artiglio II," has deposited at Plymouth, England, a fourth cargo of gold retrieved from the sunken liner "Egypt".

The latest haul was the equivalent of \$450,000. This makes the total salvaged \$3,250,000 out of \$5,000,000 in bullion in the Egypt's strong room when she sank in 1922.

Gold Stamped In B.C.

Old gold workings near Kennedy Lake, on the west coast of Vancouver Island, are being prospected again, it is learned, and a small stamping mill, leaving at least one small cannery short of help. The department of mines has had no advices from the district.

The game of badminton, then known as "Poona," was played in India for centuries before it became known to the English in 1873.

Commodity prices in Japan are advancing.

"Where is your pocket book?"

"What impudence, waking a man at two in the morning for a trifle like that!"—Lustige Sachse, Leipzig.

FANCIFUL FABLES

THE TUBA PLAYER BLOWS OUT HIS BIRTHDAY CANDLES

Sinking Of "Bright Fan" First Accident Since Opening Of H. B. Route

Ottawa, Ont.—The rescued crew of the British steamer "Bright Fan," Sunday night, Oct. 2, were still aboard the government patrol boat "N. B. McLean" anchored in Wakeham Bay on Hudson Strait, but Captain Oliver, whose vessel met disaster early Saturday morning, Oct. 1, in the middle of Hudson Strait, expects to leave with his 30 seasoners for Churchill Monday, Oct. 3, and then by rail to Winnipeg. If plans materialize, the crew will be in Churchill on Friday or Saturday, Oct. 7 or 8.

Bound for Churchill for a cargo of grain the S.S. "Pensila," Barry, England, is due to arrive in Wakeham Bay district this time Monday, Oct. 3. Wireless communication from the "N. B. McLean" will probably make final arrangements to place the shipwrecked crew aboard the incoming vessel. The radio branch of the department of marine is in touch with the government patrol boat.

While no official announcement has been given, an official inquiry very likely will be held with Captain Oliver and his crew testifying.

Probably Captain Belmont of the "N. B. McLean," which picked up the crew, also will give evidence.

Six days out from Churchill en route to England with a cargo of 250,000 bushels of grain, the "Bright Fan" struck an iceberg on Saturday, October 1, at 4:30 a.m. eastern standard time.

Flowing through the northern waters, the vessel was then about 18 miles northeast of Wales Island. Three hours later she sank. Her captain and entire crew were picked up at 9:15 a.m. by the "N. B. McLean." Answering S.O.S. calls, the patrol boat sighted the "Bright Fan" before she sank.

The accident was the first since the official opening of the port of Churchill last year.

Owned by the Pancoft Shipping Co., Cardiff, Wales, the "Bright Fan" was of 2,357 tons net and steel built.

Have Faith In League

French Premier and Viscount Cecil Come To Its Defence

Geneva, Switzerland.—France refused to share the pessimism and skepticism which is now being directed at the League of Nations, Premier Edouard Herriot of France, told the league assembly.

Viscount Cecil, British representative, also came to the league's defence, declaring the existing troubles between Bolivia and Peru, between the Chaco and the difficulties in the Far East would never have developed if each party to each dispute had applied faithfully the principles of the covenant.

"If disarmament is not achieved," he said, "the situation will be far worse than it was before the war. The nations must disarm or perish."

Protest From Veterans

Calgary, Alberta.—Alberta command of the Canadian Legion is making strong protests to the Dominion Government, because a civilian seaman, about 60 miles west of Calgary, R. G. Petley, Alberta secretary of the legion, stated an ex-serviceman, W. G. Jones, was given the apartment at first but later was turned down in favor of a civilian.

Alberta Town Proves Adoption Of Script Plan Was Excellent Business

Calgary, Alberta.—By enabling citizens of Raymond to pay off more tax arrears than ever before in the town's history, the local experiment of the council in issuing script in payment of local indebtedness has been brilliantly indicated.

Reports show a remarkable increase in tax payments of \$11,000, increased business tax receipts of \$3,200, higher water collections and improved receipts in all departments.

The town has also been enabled to pay its debtments, which became due, no money is owed the bank or current borrowings for town expenses, and in addition the council has been

New Moderator Elected

Dr. T. A. Moore Appointed Head Of United Church

Hamilton, Ont.—Rev. Dr. T. Albert Moore, Toronto, secretary to the general council of the United Church of Canada, was elected sixth moderator of the church by the general council in session here.

The election was contested by Rev. Dr. Richard Roberts, pastor of Sherbourne Street United Church, Toronto, and by Rev. Dr. W. L. Armstrong, Trinity United Church, Toronto.

Secretary to the general council of the church since the union, Rev. Dr. Moore was for many years previously an outstanding figure in the Methodist church.

A native of Acton, Ont., he began his career as a printer and publisher there. Turning to the ministry he was ordained in 1884 after completing his studies at Wesleyan College, Montreal.

Inquiry Board At Work

Unfolding Mystery Of Loss Suffered By Manitoba University

Winnipeg, Man.—A board of inquiry is slowly unfolding the mystery which envelops the loss of nearly \$100,000 in endowment funds of the University of Manitoba.

Less than five hours' investigation by the board revealed that books of the university had not been completely audited in the last eight years, and that the board had failed to comply with the statutes of the institution. The board also revealed that the board of governors had failed to comply with the statutes of the institution.

The board also revealed that the board of governors had failed to comply with the statutes of the institution.

Pension Plan For Postmasters

Would Affect Only Those Receiving Under \$3,000 Annually

Montreal, Que.—At the opening session of the first annual convention of the Canadian Postmasters' Association, Quebec branch, C. D. Griffith, Estevan, Sask., outlined a gratification plan for postmasters, which had been drawn up by a committee, of which he was a member, appointed by Hon. Arthur Saupe, Postmaster-General. The plan provided for contributions to annuity funds to be made, half by the government and half by the postmasters. It would affect only those postmasters receiving under \$3,000 annually, as those who receive more would come under the civil service pension scheme.

New Service Started

Montreal, Que.—Regular sailings between Montreal and British Columbia will be made by vessels of the Vancouver-St. Lawrence line, commencing October 12, it is announced. The Forrester will inaugurate the service, sailing for Victoria and Vancouver from Montreal.

Laborers Pay Raised

Winnipeg, Man.—City council has made its first upward pay revision. A motion to increase wages of common laborers from 40 to 42½ cents an hour was passed by council on a vote of nine to eight.

All the script was guaranteed redeemable in cash on January 15, 1933, or it could be used at any time in payment of rates and taxes.

Student Flyer's Death Caused By Accident

Parachute Used By Winters Properly Packed Stated Instructor

North Battleford.—After brief deliberation, the jury inquiring into the death of Charles J. Winters, Wilkie flying student, who crashed to his death when his parachute failed to open, returned a verdict of accidental death. No riders were included in the verdict.

Chief evidence was heard from George Bennett, R.C.A.P. instructor who has been instructing flying club students in the art of parachuting. Bennett told the court he had made 1,088 jumps during his career and in only one instance had it been necessary to use the emergency chute. He had trained between 350 to 400 students, he stated. He voiced the opinion that Winters had taken off the wing of the plane in a somersault and had become entangled in the harness, causing the chute to stay closed. He stated definitely that the parachute was properly packed.

King Pledges Party To Lower Barriers

Liberal Leader Claims High Tariffs

Ottawa, Ont.—Declaring the development of Canadian industry and commerce had been thwarted and to a large measure paralyzed by the "excessively high tariffs, enacted by the present administration," Rt. Hon. W. L. Mackenzie King, leader of the Liberal party, pledged his party's intention to seek the promotion of trade by the lowering of tariff barriers.

Speaking on behalf of W. L. Golding, Liberal candidate in the South Huron by-election which wound up with polling on October 3, Mr. King strongly criticized what he termed attempts of government spokesmen to make the imperial economic conference the issue in the contest.

Good Market In Ontario

Would Buy Alberta Coal If Freight Rate Lower

Ottawa, Ont.—With a \$5 freight rate to Ontario, Alberta coal could capture a market of from 300,000 to 400,000 tons more than is now being sold here. This was the contention of Alberta in the hearing before the railway commission.

The hearing was in connection with fixing the out-of-pocket cost to the railways in the coal movement from Alberta to Ontario in 1931. At present the shipper pays a rate of \$6.75 a ton and the difference between that and the amount the railways receive is made up by the Dominion Government. Last year that difference was \$2.22. The board reserved judgment.

Train Schedule Now Eliminates Long Stop

C.N.R. Continental Limited Has No Lay-Over At Winnipeg

Montreal, Que.—Eliminating the present 10-hour lay-over at Winnipeg, the new schedule of the Continental Limited between Montreal and Vancouver became effective with the departure of that train from Montreal and Toronto on the night of Friday, Sept. 30, it was announced by the Canadian National Railways.

The new schedule became effective eastbound from Vancouver on Saturday, October 1, and eliminates a 10-hour lay-over at Winnipeg.

Gloria's Hobby In Film Debut

Photographed in a little corner of England's Hollywood, just outside London, Gloria Swanson (extreme right) is shown casting a critical eye on a scene in which her husband, Michael Farmer, is acting with Genevieve Tobin before the movie camera. It was Farmer's first experience as an actor and he appears in the picture as Miss Tobin's husband.

NEW PRESIDENT

J. W. ROSS

of Montreal, who has been elected president of the Canadian Chamber of Commerce, succeeding Col. W. L. McGregor, of Windsor, Ontario.

Attempt Assassination Of Calcutta Editor

Two Men Commit Suicide After Plan Failed

Calcutta, India.—Two men committed suicide by poison after failing in an attempt to assassinate Sir Alfred Wason, editor of the Statesman, a daily newspaper.

Sir Alfred was shot in both shoulders as he was motoring in the Mall, a large park-like area in the heart of Calcutta. A third member of the group that tried to kill him escaped. Police found the automobile they used abandoned outside the city.

One of the bullets struck his chauffeur, who was seriously wounded, and another grazed the hand of Mrs. Rose Grosse, his secretary.

Frequent threats against the life of Sir Alfred have been made by extremists who objected to the policies of his newspaper. Last August an attempt was made to kill him, but he escaped uninjured.

Opens New Museum

Hon. J. F. Bryant Officially At Ceremony In Prince Albert

Prince Albert.—Hon. J. F. Bryant, Minister of Public Works, officially opened the new Prince Albert historical museum in Bryant Park.

The building which will house the historical relics is one of the first structures to have been built here. It was erected by Rev. James Nisbet and members of his party who landed here in 1880. For years it stood, gradually rotting away, until last year it was taken down and rebuilt in the park which is named after Mr. Bryant's father, a former resident here.

Increase In Deportations

To Countries Other Than British Empire and United States

Ottawa, Ont.—During the fiscal year 1931-1932 which ended March 31, 1932, the number of deportations from Canada to countries other than the British Empire or the United States increased over those of the preceding year by 152 per cent.

A more moderate jump of 37 per cent in the number of British deportations was recorded. Of the total deportations, numbering 7,025 in the last fiscal year, no fewer than 4,507 of those deported were sent out of Canada because they became public charges.

Charge Of Snowden That Free Trade Door "Barred," Refuted By Baldwin

Harvest Hands Will

Become Hitch Hikers

Plan To Request Ideas If Ejected From Freight Cars

Calgary, Alberta.—Police officers in western Canada are faced with a hectic time this fall if the declarations from harvest hands in Alberta mean anything.

Hundreds of the harvesters deserted wheat fields in an effort to obtain free freight on grain, and are determined to secure free transportation homeward in some manner.

The Dominion Government had on "roving riding" has created discontent among harvest camps throughout the west.

The men believe they will be able to hop the freight in the smaller towns because they figure on the Royal Canadian Mounted Policemen, the only officer usually stationed at small points, were unable to cope with 40 or 50 men seeking freight train rides.

Planes Damaged By

Storms In North

Aviators Carrying Supplies To Sub-Arctic Have Hard Time

Churchill, Man.—Pierce gales which lashed the rock-bound shores of Hudson Bay, and heavy fogs which made visibility difficult and delayed grain boats bound for this port, played havoc with the three Canadian Airways Junkers' planes, freighting from Eskimo Point to northern outposts, it was learned here.

The "J"s, heavy freighters, sustained serious damage to the pontoons and another of the Junker's planes may be out of commission for months. During the past months misadventures have dogged the footsteps of aviators freighting in supplies to lonely settlements in the sub-arctic north, and fears are now entertained that food supplies may be running low at some points.

Lumber Business Poor

Calgary, Alberta.—The prairie lumber industry faces the poorest year in its history unless an unexpected boom occurs during the next few months. E. J. Poole, secretary of the Mountain Manufacturing Sales Limited, declared the lumber business on the prairies was dead. Because of the tariff, he added, trade with the United States was practically impossible.

King Grows Lovelier

London, England.—His Majesty has reduced by 20 per cent the rents for allotments of the Sandringham estate. A year ago the King took over the adjoining 1,200-acre farm when no new tenant was forthcoming and it will now be used by 60 workmen who will hold their allotments by tenancies let by the king personally at \$4 an acre.

London, England.—Charges by Viscount Snowden that the government

was carrying out a partisan program, which it knew was "opposed by a large section of the electorate," brought a brisk reply from Rt. Hon. Stanley Baldwin, Lord President of the Council and Lord Privy Seal.

The Imperial Conference at Ottawa was lowered tariff, and introduced the principle of reasonable, not prohibitive, tariff schedules," contended Mr. Baldwin, in prompt rebuttal to the retired Lord Privy Seal. The Conservative leader thought it rather anomalous that a member of the Australian Imperial Conference, E. W. Hawker, Minister of Markets and Transport, should resign because the Ottawa conference had made tariffs too low and that members of the British cabinet had resigned because the tariffs had been raised too high.

This brief interchange of opinion between the Lord President of the Council and the man who led the free trade members of the cabinet was the chief development in the Ottawa conference which is attracting widespread interest.

Viscount Snowden declared the conference at Ottawa had "banged, bolted and barred the door of hope for greater freedom of trade throughout the world," and contended, when the full details of the agreements were known, "they will expose the hollowess of the claim that the country gained any substantial reductions of Dominion tariffs."

Cruisers Carry Aid To Earthquake Victims

Suffers In Greece Welcome Food and Medical Supplies

Athens, Greece.—Arrival of five cruisers of the British eastern Mediterranean fleet, bringing food and medical supplies for relief of sufferers from the earthquakes that have shaken Greece, was hailed here with great public demonstrations.

In the meantime the quakes continued and it was feared the casualties would be greater than originally supposed. The number of dead was placed at 200 and the injured at 400. In parts the ground sank eight feet during the main earthquake.

New Gold Find Reported

Engineers Consider Discovery In Beaver Lake District Impertinent

The Dominion Mines Department consider an important new gold discovery is reported to have been made in the Beaver Lake district of northern Saskatchewan, just west of Manitoba border, west of here. Samples of quartz pebbles reaching here are said to be heavy in gold, and 40 men are already at work in the neighborhood with prospects of continuing the work throughout the fall and winter.

Only Three Survived

Seattle.—Pieces of the battered bulk of the freighter "Nevada," pounded on a rocky Alaskan island, where 34 members of her crew were drowned by stormy seas. Only three men survived—saved by their own strength and daring and the heroism of lifeboat crews from two rescue ships.

United States Receives Notice Germany's Debt Payment Is Postponed

Washington.—Germany formally notified the United States that she would have to postpone the \$2,800,000 payment which fell due under its debt funding agreement, September 30.

In announcing the postponement, the secretary of the Treasury, Ogden Mills disclosed that on application by the German ambassador three months ago, he had waived the 90-day notice of intention required for such action. Provision for waiver on the part of the United States was written into the funding treaty.

Mills said inability to obtain the necessary foreign exchange was the reason given by Germany for the postponement.

The payment due under the mixed claims section of the funding agree-

ment amounts to \$4,800,000, and is postponed for two years at 5 per cent. The American army of occupation in Germany, according to the balance, are positioned two and one-half years and carry interest at 3½ per cent.

The secretary said a similar situation has arisen with any of the other debt nations which altogether must meet payments of \$123,500,000 on December 15, unless action is taken to postpone them. The action of Germany makes a total of \$9,052,000 in debt payments postponed this year.

Estonia, Latvia and Poland served notice on September 15 that they would be unable to make payments of \$1,252,000 due on December 15.

Wheat Exporting Countries Are Keenly Competing For World's Market Of 800 Million Bushels

The following article is by H. G. L. Strang, Director, Research Department, Scarle Grain Co., Winnipeg, Manitoba.

"The world produces each year and consumes in round figures about 4,500 million bushels of wheat. These figures do not include China, which it has been roughly estimated produces and consumes about 600 million bushels. Therefore, the total amount of wheat produced and consumed by the entire world is probably in excess of 5,000 million bushels per annum.

Most of this wheat is consumed in the country in which it is produced. Some countries, however, produce less than they require and so have to import wheat and wheat flour. Some other countries produce more than they can consume and so they have wheat and wheat flour for export sale. The amount of wheat which is thus imported and exported, most of it across the seas—or which enters into international trade—is between 750 and 800 million bushels each year. This is the market and the only market that is available for the wheat that Canada cannot consume at home and which she has to sell abroad.

Canada's average wheat production for the last ten years has been 800 million bushels per annum. Her exports or sales abroad for the same ten years have averaged 281 million bushels per annum in the form of wheat and wheat flour, or about 70 per cent. of her total production of wheat. The amount she has exported as wheat has averaged 237 million bushels per annum, and as wheat flour 43 million bushels per annum.

The total world's requirement for wheat is slightly under 800 million bushels per annum. About 20 different European countries usually import this wheat. About one-fifth of this total is imported by countries outside of Europe.

Of the European importers Great Britain is the largest, averaging about 220 million bushels each year of wheat and wheat flour, but some of this is re-exported from the United Kingdom to other countries.

The wheat exporting countries, who are keenly competing for this world's market, consist of Canada, the Argentine, U.S.A., Australia, Russia, the Balkan States and Hungary, India, North Africa, Chile, and sometimes others, stated above in the order of the quantities they export.

The average exports per annum for the last seven years for each country are shown herewith and the estimated export for the present year is shown in brackets:

Canada, 281 million (200); Argentina, 145 million (142); U.S.A., 151 million (120); Australia, 100 million (152); Russia, no average, last year 93 million, this year 70 million; other exporting countries, 100 million (75).

Those exporting countries that are able to offer for sale a higher quality wheat than the average, or who produce the average quality and offer it for sale at less than the average price, will retain at least their proportion of the 800 million bushels world's wheat market."

Only One Ever Used

United States Sinking Six Ships Which Cost Millions

Six concrete ships which have been anchored in the Mississippi River, New Orleans, are to be towed to the mouth of the Grifiva River in Mexico and sunk as a breakwater.

The ships, only one of which was ever used, were built by the United States shipping board during the world war at a cost of approximately \$1,000,000 each. They are 300 feet in length and have a 30-foot beam.

They were never placed in operation because it was found they were not suitable for commercial use. They carried 12 per cent. less cargo than steel ships of the same tonnage.

Observed Moslem Law

Justice has taken time out for the Moslem law, thereby permitting one of the faithful to have his bath before swearing on the Koran. An assault case in general sessions, New York, was held over a day when Asif Ali objected to taking oath before the Moslem law, but was told to be ready to testify in the assault trial of Mahommed Ali, 38.

By Ruth Rogers

AN IMPORTANT UNDE ENSEMBLE THAT FITS THE FIGURE—GIVES SLENDER APPEARANCE

Here's a pattern that includes panties to match your slip. Think of the time you have so often wasted in trying to find a slip and panties that matched.

You can make this darling set in a single morning. It's simplicity itself. It's surprising how little it will cost.

The slip, cut on princess lines—a 34" waist and 34" bust—finishes the neck and hem with lace. The panties have a fitted yoke and circular legs, not too full. The garters are trimmed with narrow lace to match the lace on the slip.

It's very effective in pale pink crepe silk. Style No. 846 is designed for sizes 12, 14, 16, 18, 20, 22, 24, 26, and 28. Size 16 requires 3 1/2 yards 30-inch for slip and panties with 3/4 yard 5-inch lace and 3/4 yard 5-inch lace. Price of pattern 20 cents in stamps or coin (not in stamps). Wrap coin carefully.

Now that the Ottawa Conference is over, negotiations will be opened at once for fresh commercial treaties with foreign powers, our new bargaining power coming into play for the first time.—News of the World, London, Eng.

Works Years On Scales

Wonderful Pair Has Been Designed For Weighing Earth

After seven years of laborious work, Dr. F. H. Heyl has completed a wonderful pair of scales, designed for weighing the earth.

You might expect the scales for this purpose would be of tremendous size. Actually they are quite tiny, and the most important part of them is a tungsten wire one-thousandth of an inch in thickness. So delicate is this balance that it is kept in a basement room, and protected from vibrations by treble walls.

We cannot, of course, weigh the earth as a whole. A method which has been used with success is to measure the gravitational pull exercised by comparatively small objects whose weight is known. The pull the earth exerts upon the moon and upon other neighbors in space can be found, and from this the weight may be calculated by comparison with the results obtained in the laboratory.

By means of his tiny scales, which he calls his "cosmic balances," Dr. Heyl finds that the earth reaches the very respectable figure of six thousand trillion tons, or, if you like to put it in figures, six followed by twenty-one noughts.

Belle Of Gay Nineties

The bicycle built for two is just a modern convenience for Bernard Beck and Neil Van der Veem. They recounted the tale of the gay '90s at Harvey, Ill., their home, and rode it to Mount Vernon, Iowa to visit Beck's uncle, E. C. Forrest. They averaged 90 miles a day for the 2,028-mile trip, which included a slight-sewing tour of Iowa. Their expenses were \$3.

Leads Herd Improvement

The Carrot River Valley Association again takes the honors with the high average production for herd improvement associations in Saskatchewan for the last month in records kept by the government. Edmund Herod, of Melford, holds the record with 56.6 pounds of butter fat per cow in his herd of nine Holsteins, according to announcement recently.

Greyhound Racing Old Sport

Was Practiced In Egypt Thousands Of Years Ago

Greyhound racing is one of the oldest sports in the world, although the pursuit of the electric hare is, of course, a recent innovation (written a contributor in Tit-Bits).

The opening of a new training centre in Egypt nearly five thousand years ago is one ancient Egyptian monument there is mention of racing dogs and the greyhounds—one known as Gasel, since it hunted not by scent but by sight—has retained its original shape throughout the ages. This is borne out by Egyptian mural description.

In Britain the greyhound has been known since the time of King Canute who, by statute, confined its use to the nobility. Until comparatively modern times only landowners were permitted to keep greyhounds, and it was only when the game laws were relaxed that courting became open to all.

Only One Thing Left

A thief in Montreal stole 500 gloves from a traveller's car, but they were samples, all for the left hand. The thief left his car with the left-handed gloves, and shortly after the thief left the car where the traveller had left the left-handed gloves. All that is left now is for the police to catch the man who left with the left-handed gloves the traveller left in the car.

Oil Shortage Predicted

Serious oil shortage is forecast by Dr. H. E. Elliott, noted American geologist. He points out that consumption of oil at present in Canada and the United States exceeds production, despite the depression. As soon as business improves, Mr. Elliott predicts, a serious oil shortage must occur.

With a powerful photo-electric photometer attached to a telescope, the brightness of a star can be measured to within one-half of one per cent of its value.

IS THE RULE OF RUSSIA'S RED CAESAR TOTTERING?

COMPARISON VOROSHILOV LEON TROTSKY JOSEPH STALIN

According to observers of the political situation in Soviet Russia, Joseph Stalin, the supreme dictator who holds virtual powers of life and death over 150,000,000 persons, is slated for the oblivion into which he sent Leon Trotsky, former Commissar of War and co-founder with Nikolai Lenin of the New Russia. Reports of the impending upheaval reached London, England, following the discovery of a plot to assassinate the dictator in Moscow. It is said 120 persons, including many high officers of the Red Army, were arrested. One of those allegedly implicated in the plot, Commissar of War Voroshilov, is said to be the new leader of the opposition against Stalin, who will, in the event of the latter being ousted, grasp the dictatorship. Stalin's fall is said to be due to the unsatisfactory manner in which he has piloted the voyage of the good ship Five-Year Plan. It is reported that erstwhile supporters of Stalin are beginning to believe that Leon Trotsky knew where he spoke when he accused Stalin of mismanagement of the entire affair. So far, the only Red leader who has succeeded in retaining his popularity is Nikolai Lenin, who lies in his great sarcophagus in Moscow's Red Square, the idol of millions of worshipping Russians.

Production Of Gold In Canada Has Shown Remarkable Increase During Last Seventy-five Years

"Gold is where you find it"—Canadian have been finding it in ever increasing quantities in the last 75 years that the Dominion now ranks as the second greatest producer of the precious metal among the countries of the world.

A booklet prepared by A. H. A. Robinson and issued by the Department of Mines tells of the strides taken by this industry, one that did not feel the depression and never failed to find a market for its product.

In gold figures and prosaic observations that reflect nothing of the hysteria "gold rushes," the "heart-breaking" travel of the pioneers of the Klondike or the hell of the mining camps, the record tells of the increase of Canada's output from 34,000 ounces valued at \$705,000 in 1853 to 2,685,000 ounces valued at nearly \$55,000,000 in 1931.

In 1930, after a steady increase from 1923, Canada stepped into second place among the world producers, supplanting the United States. In that year, Canada's output was 2,102,068 ounces with United States a second at 2,100,895.

South Africa, leader among world gold producing countries since 1905, has forged ahead with only slight occasional setbacks until the figure was 10,716,351 in 1930.

In 1931 Canada took a better grip on second place with 2,685,216 ounces. The United States produced 2,191,881 ounces and South Africa, still increasing its output, 10,874,145.

Gold is found in every province of Canada except Prince Edward Island, but the province of Ontario is now the heaviest producer. Of the 1931 production Ontario accounted for 78 per cent, principally from the mines at Porcupine and Kirkland Lake. Quebec produced 11 per cent. of the total, British Columbia 6 per cent., Manitoba 4 per cent., and the balance from Yukon Territory, Nova Scotia and Alberta.

Ranking with coal as the two most important mineral products of the Dominion, gold took the lead in 1931 when the value of the yellow metal produced in this country exceeded the value of coal for the first time.

Changing conditions and changed methods have written the history of gold mining in Canada, its rise and decline and second rise to even greater heights.

Placer or alluvial deposit mining which produced \$23,000,000 worth of gold in 1900, has given way to ore mining, the main source of the present day. At present the average gold recovered from alluvial sands averages \$1,000,000 per year.

At the present time companies working alluvial deposits are located as follows: Alberta, 1; British Columbia, 35; Yukon Territory, 12; Manitoba, 1; Nova Scotia, 8; Quebec, 20; Ontario, 63.

Manitoba, 5; Saskatchewan, 1; British Columbia, 35.

In a brief history of the use of gold the booklet tells of the bloody yet romantic place the metal has played in the life of the world as far back as history reveals. "The object of man's stupidity from the earliest times, gold has been, perhaps, more influential than any other metal in shaping the course of human history," says the introductory paragraph. "The use of gold has drawn men from the most remote corners of the earth and has thus paved the way for settlement and civilization in new countries. It has been a fruitful source of wars and of many other of the strenuous activities, both good and evil, of the human race."

Of little commercial value, except for ornamental purposes, gold has at no time been valued for the industrial uses to which it may be put. Valued as first as an ornamental substance of some rarity it quickly became a common medium of barter, ranking at first with silver, copper, and even stone, skins and shells. But all these other mediums passed into discard while gold remained, always and everywhere held in esteem. But it was not until the acceptance of the standard of value throughout the greater part of the civilized world.

It was a standard of value, the only industrial use of the metal at present, apart from its ornamental value, is in the making of pen nibs, and watch jewels. But it remains the only substance that is freely accepted for all services and commodities in all parts of the globe—the one commodity the market for which is never glutted.

While gold is found nearly everywhere it is not an abundant metal and its extraction is in many instances too expensive to make it a profitable undertaking. Its scarcity may be envisioned when it is realized that in the entire gold production since Columbus discovered America in 1492, were cast in a solid cube, an edge would measure only 38 feet.

Canadian gold discoveries date back to 1828 or 1824 when placer gold was found in the valley of the Chaudiere River in Quebec. But no real attempt was made to recover it until 26 years later. When the world was thrilled by the rush of gold seekers to California in 1848 and in Australia in 1851, Canada became "gold conscious" and important discoveries were made in British Columbia. This was followed by similar discoveries in New Brunswick in 1859.

In 1859 the principal output came from British Columbia. The Chaudiere placer mines in Quebec were estimated to have produced 12,000,000 ounces in 1876 and 1878.

In 1890 the discovery of rich gravels on the Klondike River in Yukon Territory brought a period of intense silver gold mining in Canada. Between 1890 and 1905 the total gold production was more than \$100,000,000 from the Yukon alone. At the same time the industry underwent great stimulation in British Columbia and Nova Scotia. The peak of this development was reached in 1900 when the total Canadian output was 1,350,057 fine ounces of gold, the largest amount recorded for any one year up to that time.

Then production fell off until 1907 when it was only 405,517 fine ounces.

Discoveries at Porcupine and Kirkland Lake brought on the greatest production the country had yet known. These were in 1909 and 1912 respectively. The success of these enterprises led other provinces to seek their home territories for similar resources with the result that Manitoba and Quebec came into the picture. The discovery of gold at Rouyn, Quebec, and developments there made Quebec the second largest producer among the provinces. "Find it in Manitoba transformed what was previously looked upon as a purely agricultural area, into what approaches British Columbia as a source of minerals."

Porcupine and Kirkland Lake remain the most important sources of gold yet found in Canada and give Canada the predominance among the factors influencing the trend of production for years to come.

In 1930, the last year for which reliable comparative world figures are available, the output of South Africa contributed about 53.5 per cent. of the world's total gold production. Canada had about 12.1 per cent., the United States 10.42 per cent., Russia 9.5 per cent., and Australia about 2.3 per cent.

"The Splendid Policy," "The Herald
Of Far Sea,"
Hodder & Stoughton, Ltd., London.

CHAPTER XXXIII—Continued.

She found Blaise's cool, measured, elderly-brotherly kindness unendurable, and she exhausted herself beating continually against the rock of his determination, without producing any effect other than to make his manner even more austere, less friendly than it had been before.

Then when she recognized her total inability to move him to any sort of responsive emotion, and that her beauty—which was undeniable—made no impression upon him than if he had been blind, she resorted to the old, painfully familiar weapons of tears and fits of temper, in the course of which she would upbraid him bitterly, pouring forth streams of reproaches which more often than not culminated in an attack of hysterics.

All of which Blaise bore with a curious, stoical self-control. It seemed as though the Tormarin temper had been exorcised, as if that fierce storm of anger provoked by Madame de Varigny's taunts, and which had so nearly resulted in a tragedy, had shocked Blaise into realization of the terrible latent possibilities of the family failing and the absolute necessity for an iron self-government.

For weeks he supported Nesta's petty gibes and ebullitions of temper with illimitable patience, and it was only when, trading on his unaccustomed forbearance, she ventured too far, that he was brought very suddenly to understand that there was a limit beyond which she might not go.

"I know why you no longer love

me," she told him at last, on an occasion when he had been vainly endeavouring, by every feminine blandishment and wile of which she was master, to excite Jean's envy by constantly enlarging to her upon the subject of Blaise's perfections as a husband, drawing entirely imaginary descriptions of the attention he paid her, and of his constant solicitude for her welfare, and vaunting her happiness at being his wife.

"I am so proud to have won so fine and splendid a husband," Jean would declare fervently. "Would you not feel the same, Miss Peterson, if you were mine?"

And Jean would make answer, outwardly unmoved:

"Indeed I should. You ought to be a very happy woman, Mrs. Tormarin."

The quiet composure which Jean invariably opposed to these gnat-like attacks annoyed Nesta intensely. Endowed with all the petty jealousy of a small nature, she herself, had the situation been reversed, would have found pin-prick kind of warfare transporting, and it made her furious that her best thought-out and most spirited efforts failed to goad Jean into any expression of either anger or distress. The "cold English-woman's" armour of indifference and reserve seemed to be impervious to no matter what point-tipped dart she used against her.

Nesta felt that, as the woman in possession, she was missing half the satisfaction in life by reason of her inability to triumph openly over the other woman—the woman without the gate. Finally, at the end of her resources of innuendo and allusion, she tried the effect of open warfare.

She had driven over to Charnwood to call and, as Claire was away, spending the afternoon with friends, Jean had perforce to entertain her undesired visitor alone. It was just as she was preparing to take her departure, when Nesta launched her attack.

"You look so ill, Miss Peterson," she remarked commiseratingly. "So pale and worn! It does not suit you. I can see, for of course you have been very pretty at one time for my husband to have wished to marry you."

The star stared at her without reply. The outrageous speech almost took her breath away by its sheer, impudent bravado.

"Nesta felt dimly. 'Now I have offended you! And I want you to be good friends. But of course'—quickly—"It is difficult for you to feel friendly towards the wife of Blaise. I can understand that. I suppose"—he had a little tilted one side like that of an equipping robin and her eyes fastened on the other's white face with a merciless, gimlet gaze that filled Jean with helpless rage—"I suppose you loved him very much?"

Jean felt the blood rush into her cheeks and caught a responsive gleam of satisfaction in the other's half-closed eyes.

"I think that is hardly a subject which can be discussed between us," she said, with a supreme effort to stave off the attack.

And then her unbought thankfulness. Thicker upon the door and announced that Mrs. Tormarin's car was waiting.

This open declaration of hostility on Nesta's part gave Jean food for reflection. Briefly she recounted the incident to Claire, adding:

"It means I must not go to Staple again. If she intends to adopt that attitude, it would make a situation which is already quite difficult enough hopelessly impossible."

The two girls were pacing up and down the terrace at Charnwood together when Jean indicated the necessity of Nesta's visit, and Claire, sensing the pain in her friend's voice, pressed her arm sympathetically. But she said nothing. What was the use of saying "Within herself, she felt that Jean's determination to eschew the

give up something for us. You will give up the infinite pleasure you appear to derive from vilifying and belittling a woman who is as much above you as the heavens are above the earth, whose conception of love is as fine and pure as yours is mean and commonplace and jealous. You will never again speak of Miss Peterson with anything but respect, nor will you ever again refer to the love which you now know for a fact exists between us. Your lips soil such love as ours. If you do, if you disobey my commands in either of these respects, you go out of my house that same day. And you don't return."

He released her and had the satisfaction, for once, of perceiving that she believed he meant what he said. Presumably she came to the conclusion that, in the circumstances, discretion was the better part of valour, for she made no attempt to challenge his determination in the matter.

At the same time, unknown to him, she compelled Jean to pay for this lesson enforced upon her at home. With a species of venom, absurdly childish in its manifestation, she ceased to excite Jean's envy by constantly enlarging to her upon the subject of Blaise's perfections as a husband, drawing entirely imaginary descriptions of the attention he paid her, and of his constant solicitude for her welfare, and vaunting her happiness at being his wife.

"I am so proud to have won so fine and splendid a husband," Jean would declare fervently. "Would you not feel the same, Miss Peterson, if you were mine?"

And Jean would make answer, outwardly unmoved:

"Indeed I should. You ought to be a very happy woman, Mrs. Tormarin."

The quiet composure which Jean invariably opposed to these gnat-like attacks annoyed Nesta intensely. Endowed with all the petty jealousy of a small nature, she herself, had the situation been reversed, would have found pin-prick kind of warfare transporting, and it made her furious that her best thought-out and most spirited efforts failed to goad Jean into any expression of either anger or distress. The "cold English-woman's" armour of indifference and reserve seemed to be impervious to no matter what point-tipped dart she used against her.

Nesta felt that, as the woman in possession, she was missing half the satisfaction in life by reason of her inability to triumph openly over the other woman—the woman without the gate. Finally, at the end of her resources of innuendo and allusion, she tried the effect of open warfare.

She had driven over to Charnwood to call and, as Claire was away, spending the afternoon with friends, Jean had perforce to entertain her undesired visitor alone. It was just as she was preparing to take her departure, when Nesta launched her attack.

"You look so ill, Miss Peterson," she remarked commiseratingly. "So pale and worn! It does not suit you. I can see, for of course you have been very pretty at one time for my husband to have wished to marry you."

The star stared at her without reply. The outrageous speech almost took her breath away by its sheer, impudent bravado.

"Nesta felt dimly. 'Now I have offended you! And I want you to be good friends. But of course'—quickly—"It is difficult for you to feel friendly towards the wife of Blaise. I can understand that. I suppose"—he had a little tilted one side like that of an equipping robin and her eyes fastened on the other's white face with a merciless, gimlet gaze that filled Jean with helpless rage—"I suppose you loved him very much?"

Jean felt the blood rush into her cheeks and caught a responsive gleam of satisfaction in the other's half-closed eyes.

"I think that is hardly a subject which can be discussed between us," she said, with a supreme effort to stave off the attack.

And then her unbought thankfulness. Thicker upon the door and announced that Mrs. Tormarin's car was waiting.

This open declaration of hostility on Nesta's part gave Jean food for reflection. Briefly she recounted the incident to Claire, adding:

"It means I must not go to Staple again. If she intends to adopt that attitude, it would make a situation which is already quite difficult enough hopelessly impossible."

The two girls were pacing up and down the terrace at Charnwood together when Jean indicated the necessity of Nesta's visit, and Claire, sensing the pain in her friend's voice, pressed her arm sympathetically. But she said nothing. What was the use of saying "Within herself, she felt that Jean's determination to eschew the

Tormarin message altogether was the only wise one.

"Poor Blaise!" pursued Jean, a slight tremor in her voice. "He has the hardest part to bear. He must make life hideously difficult for him."

Claire nodded.

"Yes. He is looking fagged and strained. Horrid little beast!" she added, with unusual vehemence. "Why on earth couldn't she have stayed dead?"

Jean laughed joyfully.

"Why indeed?—Only she never really died, you see."

"Jean"—Claire's hand crept further along the other's arm and the kind little fingers sought and clasped Jean's—"if a wicked evil-doer destroyed me, I am about you! It makes me feel wicked—disgustingly selfish and wicked!—to be so happy myself when you have so much to bear."

There were tears in her voice, and Jean squeezed her hand reassuringly.

"My dear," she said earnestly. "You had your black years if anyone ever had! If a wicked evil-doer destroyed her happiness at last, you do, . . . I suppose we all get our share of trouble in this world," she went on thoughtfully. "I remember the first time I over met Blaise—that day at Montauville, you know—he said that Destiny, with her snuffers, came to most of us sooner or later and snuffed out our light of happiness. Well"—rather dearly—"I suppose it's my turn now and she's come to me. That's all!"

A little while blew up from the valley, chill and complaining. Autumn had the world at her mercy now, and a grey mist was rising from the sodden fields, soaked by the continual rains of the preceding fortnight.

Claire shivered.

"Let's go in," she said. "It's growing too cool to stay out any longer. Besides, it's depressing. Grey skies, bare branches—Oh! How I detest the autumn!" They turned and retraced their steps to the house. As they entered by way of the front door, they caught a glimpse of the postman making his way briskly down the drive. A solitary letter lay upon the hall table, addressed to Jean in a rather florid copy-journal style of writing.

"Well, I suppose!" she commented indifferently.

She picked it up carefully, carrying it unopened to her room. Nor did she open it immediately upon arrival.

"Well, I suppose!" she commented indifferently.

She picked it up carefully, carrying it unopened to her room. Nor did she open it immediately upon arrival.

ACHES
and Pains
easily
relieved

Aspirin will relieve your suffering harmlessly and in a hurry. Swallow a tablet in a little water. The pain is gone!

It is just easy as that to be rid of the pain from an aching tooth, or headache from any cause. Muscular aches due to rheumatism, lumbago, or colds or strains, are easily overcome. Those unexplained pains of women are soothed away in an instant.

The modern way to relieve pain is with Aspirin. That is the way that modern medical men approve. They know Aspirin is safe—can do no harm—does not injure the heart.

You will always find Aspirin in any drugstore, and if you read the proven directions and follow them you will always get relief. You will avoid lots of suffering if you just remember to get Aspirin tablets. Be sure you get Aspirin and not a substitute.

"Aspirin" is a trade-mark registered in Canada.

A Better Smoke
in Any Pipe...

OGDEN'S

OGDEN'S

If you "roll your own", use Ogden's fine cut cigarette tobacco

During the month of August, Canada exported to Russia \$32,730 worth of agricultural and vegetable products and \$398,752 worth of non-agricultural products and their products. The latter was the largest export under this classification to any country excepting the United States.

When at last she slit the envelope she found that she was no tradesman's bill, as she had imagined, but a letter from Glyn Peterson's family solicitor announcing, in the stiff phrasing without which no lawyer seems able to express himself, the sudden death of her father.

Jean sat down abruptly, her legs seeming at first to give way under her, she could not grasp it—could not realize that the witty, charming personality which, after all, in spite of Glyn Peterson's lack of the more conventional paternal attributes, had meant a great deal to her, had been swept without warning out of her life forever.

Glyn Peterson had, it seemed, died very suddenly, in a remote corner of Africa, while his restless wanderings had led him, and it had been several weeks before the news of his death had reached his lawyer, who had immediately communicated it to Jean.

By his will, everything he possessed, except for a certain sum set aside to cover a few legacies to old and valued servants, was left to Jean, and with the quaint whimsicality which was characteristic of him he had particularly mentioned: "Beinfels, the House Of Dreams-Come-True."

The little phrase, with its suggestion of joyous communion, stabbed her with a sharp thrill of pain. Greeting her, as it did, at the moment when all her hopes of happiness were lying trampled beneath the iron heel of hostile destiny, it seemed to add a last touch of irony to the bitterness of the burden she had to bear.

The House of Dreams-Come-True! In the solitude and silence of her room Jean laughed out loud at the mockery of it! But her breath caught in her throat, sobriety, and then quite suddenly the terrible, healing tears began to fall, and, laying her head down on her arms, she cried unreservedly.

(To Be Continued.)

Little Helps For This Week

As thy day, so shall thy strength be.—Deuteronomy 31: 23.

Sufficient unto the day is the evil thereof.—Matthew 6: 34.

He that has so many causes of joy and so great, is very much in love with sorrow and peevishness, who loses all these pleasures, and chooses to sit down on his little handful of thorns. Enjoy the blessings of this day if God sends them; and the evils of it he patiently and sweetly. This day is only ours, we are dead to yesterday and not yet born to tomorrow.—Jeremy Taylor.

Oh, ask not then, How shall I bear this day of tomorrow? Sufficient for today, its care, its evil and its sorrow. God inspired by the way Strength sufficient for the day.—J. E. Saxby.

Arrested Thought

A Scot applied for a raise, stating he was thinking of getting married. At the end of the week he found a fairly substantial raise in his pay envelope. Some time later he met the manager and said: "I've been thinking of getting married."

"I suppose you've settled down to married life now?" asked the manager.

"I'm not married," replied the Scot. "Not married!" echoed the manager in surprise, "but didn't you apply for a raise because you were thinking of getting married?"

"Oh, yes," came the reply, "but I stopped thinking."

Request New Survey

Holding the investigation of the fish resources of Hudson Bay made by the Dominion Government in 1930 was inadequate, the fish committee of the industrial development board of Manitoba, ask for an entirely new survey.

Reports To Russia

During the month of August, Canada exported to Russia \$32,730 worth of agricultural and vegetable products and \$398,752 worth of non-agricultural products and their products. The latter was the largest export under this classification to any country excepting the United States.

or Great Britain.

R. A. Beattie Proprietors A. Haskin

Thursday, Oct. 27th, 1932

Wheat prices hit the tobac-
can this week, hitting record
low marks.

The post office is being moved
into the old Union Bank prem-
ises.

There was a large attendance
on Saturday evening at the an-
nual dinner of the Empress
Catholic Church.

The Ladies of the Congrega-
tion will meet at the home of
Mrs. N. D. Storey, on Thurs-
day, November 8th, at 3 o'clock.

Joe Radford is deputizing for
Geo. Bruce, at the beer parlor,
the latter being on a holiday
vacation.

Messrs. Agate, Fleming and
Jones of Alaska, were in town
today, they had been on a hunt-
ing expedition in the foothills
south of the river.

Dr. Wallis, eyesight special-
ist of Medicine Hat, announces
that he will be at the Empress
Hotel, on Sunday, October 6,
weather permitting. Make ap-
pointments at Empress Drug
Store.

An exchange says: "The coun-
try is just now swarmed by en-
thusiastic hunters with \$100s
and \$50s worth, who shoot away
\$1.00 worth of ammunition,
wear out \$5 worth of clothes,
to get \$50 worth of game."

The picture show on Satur-
day, October 29th, will be "The
Sign of 4," a Sherlock Holmes
detective story, one of Sir Ar-
thur Conan Doyle's most popular
sales. The program in-
cludes a two-reel comedy.

Mr. and Mrs. Alva Ellis and
son, returned from the Moffatt
district last Saturday, accom-
panied by Mrs. Gustave, who
had been visiting there for
some time previous. — News,
Alaska.

St. Mary's W.A. will hold
their annual fall sale of work
and home cooking in the Almo-
rphy Hall, on Saturday, Octo-
ber 29th, commencing at 3 o'clock.
Come and have a cup of tea.

Having secured the bank
rupt stocks of Campbell & Son,
of Vancouver, and the Black
Diamond, "Sandy" announces
a big sale of Men's and Boy's
goods. See advt. inside of pag-
e 1.

Capt. M. Thierstein of the
Salvation Army, was in town
on Tuesday and Wednesday, so-
liciting funds for his organiza-
tion. He informed us that he
had secured \$51.25, and wished
to thank the people for the sup-
port received.

HEALTH

Healthy Old Age

Our true age cannot be deter-
mined by counting the number
of birthdays we have celebra-
ted. The condition of the body
reveals its real age. Some are
old at forty; others are young
at sixty. It all depends on how
the body machinery has stood
up under use and resisted the
abuses to which so many of us
subject it.

Certain factors contribute to
attaining to a ripe old age. Heredity plays a part. In gen-
eral those who live to advanced
years have a line of ancestors
who lived far beyond the aver-
age age.

As a rule, those who pass the
four score mark are thin
people. Thinness which is the
result, not of starvation, but of
moderation in food and drink,
is the most important factor in
adding to the number of years
and in securing a healthy old
age.

The tendency is to eat more
food than is required. Young
people are more active, and
they use up the food they eat.
Older people become less active,
and as they cannot use what
they eat, they put on extra
weight, and so handicap them-
selves.

We begin life on the simplest
of diets. Older advised that
after the age of sixty, we should
simplify the diet by degrees
until we come, in the later
years of life, back to the simple

diet of a child.

The older person is well ad-
vised to avoid complicated and
highly seasoned dishes, to eat
only simple foods. Milk is a
valuable food throughout life
and should be used regularly
and freely by older persons.
Without becoming "fussy" the
older person should recognize
any foods which cause discom-
fort and avoid them. The net-
al amount of food required
varies with the individual.

No one should eat when tir-
ed. A short rest before meals
is a good habit, as it brings one
to the table free from fatigue.
However, some food — such as
hot drink at bedtime, helps
many older people to sleep. A
glass of milk by the bedside,
which can be sipped if they
waken in the early morning,
will often send them off to
sleep again.

The average number of years
we live has been considerably

increased, due to the applica-
tion of our knowledge concern-
ing the prevention of disease
and to better methods for treat-
ing the sick. The health which
older people enjoy depends at

most entirely upon their own
habits of living. As far as we
know the most important habit
for health in old age is moder-
ation in eating after the age of
forty.

This Year We Offer Our Customers

An Entirely NEW COAL

which we are certain is the best fuel value that has ever
been offered in Empress. To give some idea of the quality
of Purity Hard lower seam coal from Willow Creek in the
Drumheller field, we submit herewith the Analysis:
Moisture, 14.8 p.c.; Volatile matter, 34.9 p.c.; Ash, 4.9 p.c.;
Fixed Carbon, 45.9 p.c.; B.T.U.'s per lb. 10,440.

PURITY HARD lower seam is a new coal of won-
derful quality, free of impurities, bright in appearance,
has little ash, no waste, clinkerless, great heat lasting
qualities.

Purity Hard by name Pure AND HARD BY
NATURE.
